SUMMARY

Data Science and Artificial Intelligence student at PUC-Campinas with a technical background in Systems Development. Practical experience in developing AI algorithms, exploratory analysis pipelines, and data modeling. Proficient in Python and SQL, with strong analytical skills focused on solving real-world problems and a background in statistics. Seeking R&D internship opportunities.

PROFESSIONAL EXPERIENCE

Pontifícia Universidade Católica de Campinas (PUC-Campinas)

Inferential Statistics Monitor

March 2026 – June 2026

- Provide guidance and academic support to incoming students in consolidating concepts related to statistical inference, sampling, and hypothesis testing.
- Assist with the class's practical learning and analytical development.

Centro Universitário de Jaguariúna (UniFAJ)

IT Intern / Technical Support

August 2025 – November 2025

- Level 1 support and ticket lifecycle management.
- Diagnosis and resolution of network, hardware, and software issues.
- System standardization and technical support for academic and corporate events.

EDUCATION

PUC Campinas - **Bachelor's Degree in Data Science and Artificial Intelligence** (*Feb/2025 – Dec/2028*)

Aspire Institute - **Aspire Leaders Program** (*Aug/2025 – Oct/2025*)

ETEC João Belarmino - **Technical Course in Systems Development** (*Feb/2022 – Dec/2024*)

LANGUAGES

Portuguese: Native/Fluent;

English: Intermediate (B1/B2);

Spanish: Basic (A2)

NOTABLE PROJECTS

SIEST | Python, PyMongo, MongoDB, Next.js | [Repo](#) | [App](#)

An urban intelligence and public health platform developed for the epidemiological monitoring of arboviral diseases and public health infrastructure in the city of Campinas. The project uses ETL pipelines to integrate heterogeneous data from public sources (SINAN, CNES, IBGE, and Mosqlimate) into a MongoDB NoSQL database via PyMongo, providing an interactive interface.

8-Puzzle Solver AI | Linguagem C | [Repo](#)

A high-performance intelligent solver for the classic block-stacking game, developed in C with a focus on classical artificial intelligence and low-level optimization. The system manually implements dynamic data structures in memory for efficient pointer management and uses BFS and IDDFS search algorithms, applying mathematical concepts of inversion parity to filter out unsolvable states before processing.

Casa de Maria | PHP, Laravel, MySQL, MVC | [Repo](#)

A robust clinical management and automated medical scheduling system, built in PHP using the Laravel framework with an MVC architecture and a MySQL database. The platform encompasses the full software development lifecycle, including structured migrations, entity relationships, strict user authentication controls, and a dynamic interface with real-time schedule updates.

CERTIFICATIONS

AI and Data: Generative AI Bootcamp (AWS/Insper), Artificial Intelligence (Google Cloud), Intermediate Python (DataCamp).

Labs: Innovation and Data Training Track (AloTLab).

Cloud and Tools: Getting Started With Compute (AWS), GitHub Foundations (DataCamp), Power BI (Fundação Bradesco), LGPD (Senai).

Awards: Gold Medal in the TOEIC Bridge and Bronze Medal in the OBA (2024).

SKILLS

Programming Languages: Python, C, SQL, JavaScript.

Data & Business Intelligence: Power BI, Pandas, Matplotlib, Advanced Excel.

Frameworks & Web (Back-end): Node.js, Laravel.

Tools & Cloud: Git, GitHub, AWS, Gemini, Google Cloud.

VOLUNTEERING

Confirmation Catechist - Paróquia Santa Dulce dos Pobres

2023 – 2025

Works to prepare young people for the sacrament of Confirmation by leading studies, reflections, and discussions on the Christian faith, values, and spirituality.
